UPCOMING EVENTS

MONTHLY MEETING: January 26, 7:30 PM, Cameron Center, Thousand Oaks, CA
TOPICS: 1) New Officers, 2) *Review Club Equipment Status* 3) Sports Class,
4) Sponsored Pro / Am 2 Channel Glider Contest, 5) Organize "Phone Pools",
6) Equipment Inventory, 7) Club Budget.

MONTHLY CONTEST: February 13, 9:00 AM, Redwood School, Thousand Oaks, CA
CONTEST DIRECTOR: Mike Leal

DECEMBER MEETING NOTES:

OLD BUSINESS: None discussed

NEW BUSINESS:

1) Larry Jimenez brought in his Model Tech Angel 2000 ARF glider. Everyone noted the excellent workmanship. This 2 meter, 598 sq. in., 2 channel glider is available at Red Baron hobby shop for \$86. Not a bad deal considering all that needs to be done is covering, radio installation and final assembly. Larry should have his flying in the next week or so. We are waiting to see how well his does.

2) If the Angel 2000 flies well, we will look into using it for a "one design" type contest. Those interested, please contact Larry.

3) Contest Directors were selected. If scheduling presents a problem, please inform B.J. Weisman. (see back page for your dates).

4) HSS and SWASA are also considering a "SPORT" class for their club contests.

5) We will have already started our "SPORT" class in our club contests by the time that you read this.

6) We should publish in our next newsletter (Jan. '94) the responsibilities for the Contest Director.

TREASURER'S REPORT:

TOSS has \$580 to its name along with approximately \$400 plus in debts.

JANUARY CLUB CONTEST

Good turnout by TOSS members and other club members along with minimal equipment problems made this a good contest. It was also our first contest where a "SPORT" class held for any flier of any skill level competing with a 3 channel glider with no compensation (mechanical or electrical). There is no restriction to wingspan. As a reminder, this new class replaces the previous "SPORTS-MAN" class. Prizes are distributed according to our old rules. To first, second and third in

OPEN class. First and second in TWO METER. With only first in SPORT.

Competition was tough, with some surprising results in the OPEN class. Two of the top three places were taken by polyhedral gliders (a OLY II and a Cumic). Who says you need a high-tech plane to do well. What even made this more amazing was the Santa Anna winds yielding many downwind launches. The same winds caused at least three "OFF FIELD" landings. Two of these were by one of our best pilots who shall remain nameless (his initials are B.J.), so let this be a reminder to us all that we should monitor our height versus our upwind return distance and allow some safety margins. You can never be sure when the winds will pick up and bring strong sink into your flight path.

Edgar had his usual "out of range" problems. He is attributing it to his "rubber ducky" antenna. If any else (other than Bill Karp) is aware of this problem, please let Bob Swet know so that he may inform other club members.

Cash prizes were given out due to the fact that no-one ordered plaques. Lastly, Larry Jimenez gave out raffle tickets free of charge to all club members who participated. These tickets will be good for the raffle held at the monthly meeting. See details this newsletter.

CONTEST DIRECTOR RESPONSIBILITIES

1) EQUIPMENT - all required equipment shall be at the field in good working order and set up prior to the start of the contest. This includes sufficient quantity of fully charged batteries if winches and retrievers are to be used. Means of scoring landings for at least three different locations is also required if landing are to be scored. If special equipment is needed by the pilots, it is the C/D's responsibility to see that it is provided (this does not include planes, radios but would include altimeter watches, light sticks or other similar devices).

2) SCORING - sufficient quantity of score cards will be available to the fliers along with the means of calculating scores (tables, calculators, or computer).

3) REMIND - call all commonly participating TOSS club members the Friday prior to the contest. Note: a phone pool may be used to accomplish this.

4) PUBLISH - if you are having a special format contest, a description of the format along with type of gliders allowable must be published in the TOSS newsletter for at least one month prior to the contest date. Examples: Two meter only, one design, pro / am, high start launch, etc.

by Dane Vannett and Bob Swet

TOSS MONTHLY RAFFLE

Larry Jimenez has organized and started a monthly? raffle in effort to attract more participants to the monthly club contest and meeting. The rules are simple as I understand them. 1) You get one free raffle ticket when you participate in the monthly contest. 2) You also get one free ticket for attending the monthly meeting. 3) Additional tickets are available for sale at the monthly meeting. 4) During the meeting, the raffle will be held. 5) You must be present to win.

Larry is asking for any applicable donations that you may have. His goal is to this at no cost to the club. It's an excellent cause so please help out and participate.

OUT WITH THE OLD & IN WITH THE

If you paid careful attention to the front page, you would have noticed that all of the club officers have changed. I would like to thank on behalf of all TOSS members the 1993 officers for the job well done. It takes many personal hours to keep this club functioning. They spent many a hour on the phone, keeping the books, going to the bank, filling out forms, and putting your newsletter together. When you see them, be sure that you thank them. They deserve a big pat on the back. That is their only reward for all their work.

THANKS Mike Reagan, Edgar Weisman,
Thomas Akers, Mike Leal, and Larry Jimenez.

SPECIAL THANKS is extended to Art and Don McNamee for their efforts to maintain our club's winches and retrievers. Without these two guys, we would be using high starts much more often than we currently do.

by Bob Swet

I NEED YOUR HELP !

As your newsletter editor / publisher, I am requesting that EVERY club member contributes ONE article, picture, helpful hint, cartoon suitable for publishing in YOUR newsletter. Last year, Larry discovered how difficult and time consuming it is to put a monthly newsletter. You can make our lives allot easier by making one contribution each year.

I will accept any hand or typed written article, hand drawn cartoon, faxed or computer generated item that can be received by a fax/modem. I can translate most common word processor and drawing formats. So don't be shy even if you own a MAC. All items must be submitted by the 10th for the month to published in. Please call before sending a fax or file.

THANKS

Bob Swet

EXCELLENT IDEA

Bill Hinman has proposed that The Red Baron sponsor a PRO / AM contest in hopes to "introduce the joys of soaring and soaring contest participation". Please read his proposal before our next meeting which is when it will come up for discussion. We are very, very fortunate to have a hobby shop like Bill's that is so willing to work closely with TOSS.

1994 DUES

If you haven't paid your 1994 club dues already, you are late. Effective March 1st all previous year members who have not paid their dues, will be removed from the TOSS roster and newsletter mailing list. Payment (and completed application) should be given / sent to Larry Jimenez. For those who can't remember if you have paid already, please refer to the roster listing (updated 1/20/94) within this newsletter.

FOR SALE

If you have items that you would like to advertise within this newsletter, please submit a description of and price for the item prior to the 10th of each month that you desired to have it published.

Larry Jimenez is working with various hobby shops to develop a commercial side to this aspect. He hopes to list special sale items at their locations and is investigating collecting minimal revenues by doing so.

JOAN and BILL HINMAN

December 27, 1993

Dear Fellow TOSS Members,

We would like to join with you in helping to develop a program to get more new people introduced to the joys of soaring and soaring contest participation. I have been encouraged by the articles published in various soaring community newsletters (including our own) concerning how to get newcomers involved, and hope that you will allow me to help by sponsoring a meet.

The attached proposal presents the basics that I personally would like to see in such an event. I am not attaching any restrictions to my sponsorship offer so long as the event is specifically aimed at novice participation, but would hope that you would consider some of my recommendations when you draw up the official contest rules.

I would also suggest investigating the possibility of one day AMA or Sport Flyers insurance coverage for novices to avoid the requirement of membership payment before participation in this one contest.

Please let me know what your feelings are and what I can do to help.

Sincerely,

Bill Hinman

Proposal to the Thousand Oaks Soaring Society for

The TOSS - Red Baron Pro-Am Two Channel Glider Meet

Objective:

To introduce newcomers to the joys of soaring by close association with the experts and to get them past their initial reluctance to participate in organized competition.

Suggested features:

Novice glider fliers would be randomly teamed with experienced pilots for the competition. Pro-Am scores would be combined to determine winners.

Unlimited coaching is encouraged. Pros fly first; explaining as they fly. Novices fly immediately afterward with Pro providing tips and hints.

Rudder/elevator gliders only. Pro and novice can fly same glider if desired.

Keep tasks simple and achievable for novices, such as two minute precision and three flight, 12 minute add-em-up with landings. (Tasks for Pros might be made harder.)

Provide advanced publicity for the meet, allowing at least two months advertising/building time before the event. (April is a nice month.)

Hold a glider educational seminar at the field the week before the contest. Teach competition principles and conventions, timing procedures, hands-on winch/high start operations, etc.

Fliers normally classified as "Sportsmen" might compete in a separate class, but would also be randomly teamed with other Sportsmen for the combined score event.

The Red Baron hereby agrees to provide prizes and/or trophies for a contest based on the above principles.

THOUSAND OAKS SOARING SOCIETY

PRESENTS

TWO METER "TOP GUN" CONTEST

APRIL 10, 1994

Contest Directors: B.J. and Edgar Weisman

TASKS: Called flight order with 25 foot landing tapes.

- First 3 Min. Scored 700 flight / 300 landing points.
- Second 5 Min. Scored 800 flight / 200 landing points.
- Third 7 Min. Scored 900 flight / 100 landing points.
- Fourth 5 Min. Scored 800 flight / 200 landing points.
- Fifth 3 Min. Scored 700 flight / 300 landing points.

LANDINGS: Measured from center of 25 foot circle.
On grass.

SCORING: Lowest round will be dropped. Total score will be on the best four flights, with perfect score of 4,000.

RULES: AMA: ALL airplanes will have a wing span of not more than 2 meters. Wings will be measured at the field. (A chain saw will be provided for on field wing span reduction.)

Winches: 12 VOLT, approximately 600 feet to turn around.

LIMITATIONS: Contest will be limited to 100 pilots and three pilots per frequency.

FIELD: Redwood Intermediate School, Thousand Oaks, CA
LOCATION: On the North East corner of Gainsborough and Camino Manazanas. See map.

RESERVATIONS: Send your contest fee and frequency reservation to TOSS

c/o B.J. Weisman
P.O. Box 3921
Thousand Oaks, CA 91360

PHONE: (805) 498-8878
(805) 495-0156

CLASSES: The contest will have two classes;

Professional Expert: Entry Fee is \$30.00
Of this fee \$10.00 will remain with TOSS and the balance of \$20.00 will be held in an award "pot" to be divided as follows:

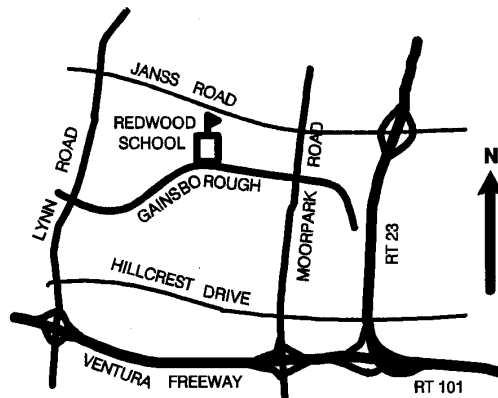

- First Place 50% of the pot
- Second Place 30% of the pot
- Third Place 20% of the pot

Sportsman: Entry Fee is \$10.00

Trophies for this class will be from 1st to 5th place.

PILOTS MEETING: 8:45 AM 4/10/94

CONTEST STARTS: 9:00 AM 4/10/94

ADVANCED REGISTRATION: Please fill in the information below and mail to; TOSS, c/o B.J. Weisman, P.O. Box 3921, Thousand Oaks, CA 91360. Be sure to include proper payment and your preference of frequencies. [Make checks payable to TOSS] You will be notified if your first frequency is not available.

DAVE THORNBURG'S RULES

- ① **Drift with the lift.** Thermals tend to blow along with the wind, so follow them.
- ② **Stay with what you've got.** Low thermals have down air nearby.
- ③ **There ain't no zero lift.**
 - a) A weak, low thermal will almost always grow.
 - b) If you're not sinking, there's some lift.
 - c) If you're sinking, move someplace else — fast!
- ④ **Don't leave a thermal and come straight back upwind.**
 - a) Sink holes follow thermals.
 - b) Strong lift will usually have strong downs nearby — and vice versa. If some air is going up, some other air must be coming down to replace it, and vice versa. Sometimes the patch of down air (sink) is so large that you can't get out of it.
- ⑤ **Fuselage angle indicates rising or sinking air.**
 - a) Thermals will tend to push the plane outward, so turn back against lift-induced turn to get into the core
 - b) Establish where the core is by making a couple of passes through the lift.
 - c) Once circling in lift, notice which side of the circle is better, and drift in that direction. The implicit rule is: Slow down in lift, and speed up in sink. Once you find a thermal, don't lose contact with it! Sometimes you find a nice thermal and think you've got your 10 minutes made. You relax. The next thing you know, you're sinking, and you're wondering where the heck the lift went!
- ⑥ **Develop a minute sensitivity to air quality.**
 - a) Lift comes through in cycles.
 - b) Hot spots for thermals and ridge-type lift tend to stay put for a long time.
 - c) A thermal passing through as you launch can often be overtaken downwind.
 - d) A sudden wind shift usually indicates a thermal nearby — the wind on the ground blows toward the thermal.

You need to feel small air-temperature changes — warmer means lift, colder means sink.
You need to know which way the wind is blowing without looking at your ribbon.
- ⑦ **Learn to use ballast**
 - a) Wing loading translates into flying speed (the heavier the plane, the faster it must fly).
 - b) The trick is to add enough ballast to achieve good glide speed without handicapping the ship in weak lift or making it too hard to land.
 - c) If the wind is strong enough to require ballast, flying downwind is usually bad. The fast, more efficient ships benefit most from ballast. There's no point putting a pound of lead in a Windrifter for 20 mph conditions, because it won't fly faster than 20 mph anyway.
- ⑧ **Ways of finding lift.** There are several visible signs of lift that you should watch for: shifts in the wind or temperature, swifts chasing bugs, other sailplanes, etc. Soaring birds may be around to key off of, but they may be up too high for accurate thermal telltale. Piggybacking off another flier also works!

Model Builder, Sept '87 / NSS Journal, Nov. - Dec. '88
